Method and device for producing an encrypted payload data stream and method and device for decrypting an encrypted payload data stream

#### Field of the Invention

The present invention relates to the encryption and decryption of payload data and in particular to an encryption concept in which the payload data is encrypted by means of a certain key, the key being encrypted in turn to realize a customer-selective transmission of payload data.

15

#### Background of the Invention and Prior Art

With the occurrence of telecommunication networks and in particular due to the huge spreading of multimedia data-capable personal computers and, most recently, of so-called solid state players, a need has arisen to market digital multimedia data, such as digital audio data and/or digital video data, commercially. Telecommunication networks for example can be analog telephone lines, digital telephone lines, such as ISDN, or the Internet. Among the commercial providers of multimedia products there is a need to sell or lend multimedia data, wherein it should be possible for a customer to be able to select a certain product individually at any time from a certain catalogue, this product then of course being only allowed to be used by the customer who has paid for it.

**LICENSE FOR FOREIGN FILING UNDER**  
**Title 35, United States Code, Section 184**  
**Title 37, Code of Federal Regulations, 5.11 & 5.15**

**COPY****GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

**NOT GRANTED**

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).
